Model: DOT2

ProAccurate® Oven Thermometer

150 to 550°F/70 to 280°C

The best-selling CDN ProAccurate® Oven Thermometer (DOT2) is specially designed to measure oven temperatures with precise accuracy, ensuring best culinary results. Thermostats become fatigued with age. Leaky door seals can cause hot or cool spots. For best results with your oven, use the DOT2 to monitor the exact oven temperature.

Made from durable stainless steel with 2-way mounting and a durable laboratory glass lens that resists cracking and breaking, this NSF® Certified oven thermometer has a wide temperature range of 150 to 550°F/70 to 280°C. In addition to its culinary benefits, the DOT2 can help save energy by ensuring that heat is not wasted by an oven that's too hot.

Features

- NSF® Certified
- Ovenproof
- Durable laboratory glass lens
- 304 stainless steel housing

Specifications

Measurement Range: 150 to 550°F/70 to 280°C

Display Size: 2 (in)/5.1 (cm) dial

Weight: 2.2 oz/62.4 g

UPC: 0 18436 00251 2

Other:

- Target range indication
- 2-way mounting: stand/hang
- Celsius
 - DOT2C 0 18436 00730 2
- Spanish
 - DOT2-SP 0 18436 00708 1
